An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with C.G. Mersereau on 4/17/06.

The application has been amended as follows:

In claim 1, in the first line of paragraph (g), "can" has been deleted and --is adapted to-- has been inserted.

In claim 19, in the first line of paragraph (g), "can" has been deleted and --is adapted to-- has been inserted.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figure 2 of the formal drawings submitted on 2/20/02 should be deleted and figure numbers 3-18 should be changed accordingly. The original specification and drawings included figures 1-17. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance: The subject matter of the independent claims could either not be found or was not suggested in the prior art. The subject matter not found was the sensing of evoked responses between all combinations of any two of said electrodes, in combination with the other elements in the claims. The prior art of Haefner et al or Greeninger et al show the use of multiple sensing configurations between different
